T.E. (I.T.) (End Semester)

DATA BASE MANAGEMENT SYSTEMS

(2012 Pattern) (Semester - I)

Time: 2½ Hour] [Max. Marks: 70

Instructions to the candidates:

- 1) Answer Q1 or Q2, Q3 or Q4, Q5 or Q6, Q7 or Q8, Q9 or Q10.
- 2) Neat diagrams must be drawn wherever necessary.
- 3) Figures to the right side indicate full marks.
- 4) Use of calculator is allowed.
- 5) Assume suitable data if necessary.
- Q1) a) Discuss the entity integrity & referential integrity constraints. [4]
 - b) For a Library Management System following information is maintained. [6]

Books (Accession_no, Title, Author, Price, Booktype, publisher)

Borrower(Membership_no, Name, Address, Category, max_no_of _books_issued, Accession_no)

Draw E-R Diagram for the above taking into consideration following constraints and by making use of atleast one Extended ER feature:

- i) A book may have more than one author.
- ii) There may be more than one copy of a book.
- iii) Borrower can be staff or a student. Depending on this category max number of books that can be issued will vary. [i.e. student can ask for max 3 books whereas staff can ask for 10 books]

OR

- Q2) a) What do you mean by correlated subquery? How it is different from uncorrelated subquery.[4]
 - b) How to use oracle sequences? Explain with proper example. [6]

Q3) a) For the Given transactions T1 & T2 check if the schedule is conflict serializable. [5]

T1	T2
Read (A)	
Write (A)	
	Read (A)
	Write (B)
Read (A)	
Write (A)	
	Read (B)

Justify your Answer.

b) What are the costs to be considered when a transaction has to be rolled back when recovering from deadlock. [5]

OR

- Q4) a) Explain Join in SQL. Give proper example for Recursive Join. [6]
 - b) How multiple granularity locking can improve two phase locking. [4]
- Q5) a) Enlist the technical advantages when going from one tier to two tier architectures also specify the disadvantages with which 2 tier architectures suffer from.[8]
 - b) What are the key elements of parallel processing. [6]
 - c) Enlist the Advantages & Disadvantages of Replication. [4]

OR

- Q6) a) If you were designing a web based system to make airline reservations & sell airline tickets, which DBMS architecture would you choose from Centralized & client server Architecture? Why? Why would the other architectures not be a good choice
 [8]
 - b) Draw & Explain architecture of parallel databases. [8]
 - c) Enlist various architectural models for parallel databases. [2]

	b)	XML & JSON. [6]	
	c)	Discuss Hbase Data Model. [6	[[
		OR	
Q 8)	a)	Give the DTD for an XML representation of the following neste relational schema. [7]	
		Emp = (ename, ChildrenSet set of (Children), SkillSet Set of (Skills)))
		Children = (name, Birthday)	
		Birthday = (day, month, year)	
		Skills = (type, Examset setof (Exams))	
		Exam = (year, city)	
		Use the DTD and write the following queries in Xqueries format.	
		Find the names of all employees who have a child who has a birthda in March.	У
	b)	What is HDFS? Explain in detail. [5	[]
	c)	When to use Hbase & When not to use it. [4	[]
Q9)	a)	What are the characteristics of NoSQL cloud databases? [8	3]
	b)	Draw & explain the machine learning system model. What factor affect the performance of the system? [8]	
		OR	
Q10)	a)	What are the design criteria for mobile databases? List existing mobil databases.	
	b)	XML can be used to create new Internet language. Justify. Enlist feature	S

[4]

[8]

Q7) a) How data validation is done in XML.

& advantages of XML.
