**P3412** 

[4959]-186

## **B.E.** (Information Technology) **c: COMPILER DESIGN**

(2008 Course) (Semester - I) (Elective - I) (414443)

Time : 3 Hours]

[Max. Marks:100

Instructions to the candidates:

- 1) Answer three questions from each section.
- 2) Answers to the two sections should be written in separate answer- books.
- 3) Neat diagrams must be drawn wherever necessary.
- 4) Figures to right indicate full marks.
- 5) Assume suitable data, if necessary.

#### **SECTION-I**

- *Q1*) a) With the help of the block diagram explain phases of the compiler. Also write down output of each phase of the compiler for expression P = Q + R / 2 where p and Q are of float type and R is of integer type. [10]
  - How lexical analyses detect the errors? Explain with suitable example.[6] b)

#### OR

- Write a LEX program to *Q2*) a)
  - i) Write a LEX program which find out factors of a given number.
  - Write a LEX program to find the area of circle. ii)
  - Discuss the merits and demerits of a compiler and an interpreter. b) [8]
- For following grammar *Q3*) a)
  - $S \rightarrow AaBb$
  - $A \rightarrow \epsilon$
  - $B \rightarrow \epsilon$

[Total No. of Pages :4

SEAT No. :

[8]

|  | i)   | Compute first and follow sets.                    | [6]  |
|--|------|---|------|
|  | ii)  | Construct LL(1) parser.                           | [4]  |
|  | iii) | Parse string "ab" with above parser.              | [2]  |
| b)   | Dif  | ferentiate between top down and bottom up parser. | [6]  |
|  |      |   |      |
| <b>Q4</b> ) Show that following grammer is $LR(1)$ but not LALR. |      |   | [18] |

 $S \rightarrow Aa |bAc| Bc | bBa$ 

 $A \rightarrow d$ 

 $B\,\rightarrow\,d$ 

- **Q5)** a) What are SDD? Give SDD to translate expressions into syntax tree and draw syntax tree for a / b \* 5 + c. [8]
  - b) What is Backpatching? How flow translation of Boolean expression is done using batchpatching? [8]

#### OR

- Q6) a) Write a grammar for simple procedure call. Give a syntax directed translation scheme for the same. [8]
  - b) Translate following assignment statement into intermediate code [8]

A [i] [j] : = (B [i] [j] + C [i] [j])\* 10

### **SECTION-II**

- Q7) a) Explain following parameter passing methods with suitable example. [8]
  - i) Call by value
  - ii) Call by reference
  - iii) Call restore
  - iv) Call by name
  - b) What are symbol tables? Explain in brief the different ways to organize symbol table. [8]

OR

[4959]-186

| <b>Q8)</b> a)         | Explain different source language issues.                              |  | ] |  |
|-----------------------|--|--|---|--|
| b)                    | Explain following storage allocation schemes with proper examples. [8] |  |   |  |
|                       | i)   | Stack storage allocation   |   |  |
|                       | ii)  | Heap storage allocation  |   |  |
| <b>Q9)</b> a)         | Wit  | With proper examples explain following peephole optimization techniques: [8] |   |  |
|                       | i)   | Elimination of Redundant Instruction.  |   |  |
|                       | ii)  | Elimination of Unreachable Code.   |   |  |
|                       | iii)   | Flow of Control Optimization.  |   |  |
|                       | iv)  | Algebraic Simplification.  |   |  |
| b)                    | Dis  | cuss different issues in code generation phase. [10                          | ] |  |
|                       |  | OR   |   |  |
| <b><i>Q10</i></b> )a) | With proper examples explain following optimizations:                  |  | ] |  |
|                       | i)   | Constant propagation.  |   |  |
|                       | ii)  | Variable propagation.  |   |  |
|                       | iii)   | Strength reduction.  |   |  |
|                       | iv)  | Dead code elimination.   |   |  |
|                       | v)   | Common subexpression.  |   |  |
| b)                    | Wh   | at is DAG? Write different applications of DAG. [8                           |   |  |

[4959]-186

3

- *Q11*)a) Explain different features of object oriented programming with example.[8]
  - b) How can overloading and overriding of functions in object oriented programming languages handle by Compiler? Explain in detail. [8]

#### OR

- Q12)a) Explain differences between class based language and object based language with example.[8]
  - b) Explain exception handling in object oriented programming with example. [8]
